

1. A plague is a severe illness and can often lead to death.
- a. Not given
 - b. False
 - c. True
2. Bubonic plague is the most common form of plague.
- a. False
 - b. Not given
 - c. True
3. Bubonic plague is the most common form of plague.
- a. Not given
 - b. False
 - c. True
4. Can the plague be transmitted from person to person?
- a. Yes, it's main way to its spreading
 - b. No, it can never be the case
 - c. Yes, but it's rare
 - d. It is still unknown
5. Choose the correct statement.
- a. Only animals can have a plague
 - b. Animals are incidental hosts of Yersinia pestis
 - c. Both animals and humans can be the main hosts of Yersinia pestis
 - d. Animals are main hosts of Yersinia pestis
6. Choose the correct statement.
- a. Only animals can have a plague
 - b. Both animals and humans can be the main hosts of Yersinia pestis
 - c. Animals are incidental hosts of Yersinia pestis
 - d. Animals are main hosts of Yersinia pestis
7. How does secondary pneumonic plague occur?
- a. Due to hematogenous seeding of the lungs with Y pestis in patients with untreated other forms of
 - b. Due to inhalation of respiratory tract droplets from a human or animal with pneumonic plague
 - c. Due to untreated primary pneumonic plague
 - d. Due to hematogenous seeding of the lungs with Y pestis in patients with respiratory diseases
8. How does secondary pneumonic plague occur?
- a. Due to untreated primary pneumonic plague
 - b. Due to inhalation of respiratory tract droplets from a human or animal with pneumonic plague
 - c. Due to hematogenous seeding of the lungs with Y pestis in patients with respiratory diseases
 - d. Due to hematogenous seeding of the lungs with Y pestis in patients with untreated other forms of
9. Most cases of plague are happening in big city centres.
- a. False
 - b. True
 - c. Not given
10. Most cases of plague are happening in big city centres.
- a. Not given
 - b. True
 - c. False
11. PlagueNaturally acquired plague most commonly manifests in the bubonic form, with acute onset of
12. The rarest form of plague is meningeal.
- a. Not given
 - b. False
 - c. True
13. The rarest form of plague is meningeal.
- a. False
 - b. Not given
 - c. True
14. What are buboes?

- a. The pathognomonic rash
- b. The type of cells that are found in the blood

c. The lymph nodes that are swollen

- d. The pathognomonic type of fever

15. What are buboes?

- a. The pathognomonic type of fever
- b. The type of cells that are found in the blood
- c. The pathognomonic rash

d. The lymph nodes that are swollen

16. What is the most common way of plague transmission?

- a. Inhalation of respiratory tract droplets from an animal with plague
- b. Person-to-person transmission
- c. Haematogenic transmission

d. Through the bite of infected rodent fleas or direct contact with tissues of infected animals

17. What is the most common way of plague transmission?

- a. Person-to-person transmission
- b. Haematogenic transmission
- c. Inhalation of respiratory tract droplets from an animal with plague

d. Through the bite of infected rodent fleas or direct contact with tissues of infected animals
